Infonox makes it Possible.

Check Cashing • ATM • Money Order • Bill Payment • Prepaid Stored Value • Gift Cards
Prepaid Top-up • Instant Issue Loyalty Cards • Remote Deposit Capture • Shared Branching

KioskPASS

INFONOXSM
a TSYS[®] company

The KioskPASS[™] Self-Service solution from Infonox offers the most comprehensive portfolio of financial services in the industry. Our technology enables these services through a seamless, easy to use interface, encouraging trial usage and repeat customers.

Is your ATM volume drying up?

Traditional ATM's are DEAD!

With ATM volumes declining year over year, deployers are realizing that single-purpose, legacy ATM's cannot support the leap to new products and services. With Infonox's award-winning TransIT[™] technology, deployers can offer a wide variety of services designed to increase foot traffic and generate incremental sales. The new PASS+[™] Kiosks are a virtual Financial Services Center in the same footprint as a typical ATM.

Say good-bye to your single-purpose, low revenue ATM's and start generating \$50 - \$100 revenue per square foot with a Multi-Transaction Financial Services Kiosk.

The self-service revolution is here! The demand for self-service financial services has never been stronger. Customers of all types enjoy the convenience and speed of using Kiosks to perform all sorts of important transactions, from voting, to renting DVD's and buying iPods. The market is ready for the next generation of multi-function Kiosks that enable a complete portfolio of financial services, all in a single, small and cost-effective footprint.

Retailers today are faced with many obstacles and challenges to establishing a positive cash-flow kiosk solution, having to establish relationships with numerous companies to bring the Kiosk to market. With Infonox, we've already done the heavy-lifting in designing a fully functional and robust hardware / software solution, including all of the technology necessary to manage the Kiosk network and connect to an entire suite of service providers.

Are You Ready?

Creating a self-service financial services kiosk from scratch can be an overwhelming and costly endeavor. The coordination of the hardware, software, servicing, and customer support is a complex and challenging obstacle for most deployers.

This is where Infonox Professional Services and TransIT[™] Technology can help! Infonox's PASS+[™] series of Kiosks have been designed to offer the most advanced and innovative self-service solutions in the industry. Our award-winning technology and over ten years of self-service experience enable you to realize a self-service strategy in a fraction of the time of conventional solution providers.

Create incremental revenue opportunities

Deliver new products and services to your customers, such as check cashing, money transfer and remote deposit capture.

Drive customer loyalty

Customers are eager and excited to use self-service Kiosks for these services. The solution allows you to issue branded loyalty and prepaid cards to customers instantly at the Kiosk. Cardholders can then receive special pricing and promotional information for any transactions on the Kiosk.

Lower labor costs

Reduce your labor costs and shorten check-out lines by moving services, such as money orders, bill payments and top-up transactions, to the easy to use self-service Kiosk.

Bring Innovative new services to your customers

Our thin-client platform supports a simple upgrade path to offer new capabilities as they become available and our leading edge support tools ensure the highest levels of availability, ensuring that your Financial Service Center is there when your customers want it.

Offer these Turn-key services to your customers Today!

ATM

ATM transactions, such as cash withdrawal, transfers, balance inquiries and statements, drive significant foot traffic to the Kiosk and raise awareness of other services.

Bill Payment

It is estimated that more than \$80 Billion in walk-in bill payments will be processed by 2009 - Infonox supports connections to thousands of billers and lenders through our service providers.

Money Orders

Money Orders are still alive and well with almost 900 Million items issued last year.

Gift Cards

The Gift Card market is projected to be more than \$132 Billion by 2008. The Infonox Kiosk can instantly issue gift cards from multiple brands in various denominations, customized by the Customer on-demand .

Money Transfers

Money Transfers, typically confined to customer service desks and check cashing locations, can be fully supported on an Infonox-enabled Kiosk. The Money Transfer market is growing rapidly and represents an extraordinary new revenue opportunity for your location. Infonox is already certified on the largest money transfer providers in the industry.

Check Cashing

Tap into the more than \$55 Billion dollars and 180 Million checks that are cashed every year by un-banked and under-banked consumers.

Stored Value Cards

Un-banked and under-banked customers are quickly embracing prepaid stored value cards as an important money management tool that doesn't have the pitfalls of a traditional bank account and debit card. The Kiosk can easily support the instant issuance of a stored value card as well as providing a convenient "top-up" location to add funds to the account.

Remote Deposit Capture

The Remote Deposit service allows consumers and small businesses to use the Kiosk as a convenient deposit station instead of having to travel to their bank . You benefit from a commission paid on each deposit from the Customer's bank and a service that keeps them coming back each day.

Prepaid Top-up

The prepaid mobile market was estimated to represent \$18 Billion in 2004 and continues to grow at a steady pace. The Kiosk can support both the issuance of pins or the instant top-up via a number of service providers.

Prepaid Long Distance

While often overlooked, the prepaid long distance market remains a significant revenue opportunity. Your stores can offer these services via the Kiosk and reduce the labor associated with selling cards at the counter.

What are your Options ?

PASS+[™] and TransIT[™] – combined to offer turn-key solutions for your self-service strategy

Option 1: Full Turn-Key	Option 2: A La Carte Service Options with Infonox Technology and Professional Services Support
